Finance Director, Leeds

Description

Double digit growth, an evolving product base and multiple new markets means that this West Yorkshire SME has significant plans for the next 5 years. These plans will likely involve external investment which will enable them to scale-up more quickly and effectively.

To date, the business has managed to operate successfully with a loyal Financial Controller (whom they would hope to retain) but they now need to hire an experienced FD to help grow the operation and take it through a round of funding which will unlock their true potential.

As part of their growth journey, it is important for them to invest in strengthening and evolving their internal financial controls environment whilst also increasing the level of analysis and insight which will be required as part of any external funding deal.

Alongside the technical work, the successful candidate must be adept at influencing and challenging an established and experienced senior team.

Currently in a no.1 or no.2 position you will have experience of a similar working environment. Perhaps your current aspirations for growth have been stymied by the Pandemic and you're keen to ensure your CV does not plateau?

The successful candidate will have a down to earth, collaborative and engaging style. You must be ICAEW / ICAS, ACCA or ACMA accredited and able to demonstrate a hands on and commercially nimble approach to business.

There will be LTIPs in place along with the opportunity for equity at a later date.
